# 2058

## Synthetic Vacuum Pump Fluid

2058 is designed to provide excellent service and a very long fluid life in virtually all types of vacuum pumps. It offers exceptionally low vapor pressure, superior chemical stability, a very high resistance to oxidation, excellent thermal and shear stability and readily separates from water.

### ATTRIBUTES

- Low vapor pressure
- Thermal, chemical and oxidative stability
- Carbon, varnish, wear, rust and corrosion control
- Low volatility
- Excellent film strength
